## General Information

We reserve the right to change technical specifications without prior notice.

### *Colour*

Due to limitations in the manufacturing process, colour may vary from batch to batch.

### *Installation*

The method of installation should conform to BS5325. The subfloor should be dry, smooth, clean and level and any defects should be made good before laying. For installations requiring more than one width, consideration should be given to seam locations, as pattern matching cannot be guaranteed.

### *Maintenance*

Vacuum for normal day to day cleaning. Spills and stains must be removed as part of a comprehensive maintenance plan including the use of dry or hot water extraction methods when required, depending upon local conditions.

Drury Lane products will provide maximum performance if installed and maintained in accordance with the recommendations set out in our installation and maintenance schedules, available on request.

## Express samples
